Project Summary:
**Purpose:** To promote renewable energy in schools
**Timeframe:** 2014–2019
**IBRD Financing:** US$120 million
**Project ID:** P125022
**Mitigation:** Renewable Energy

**Beijing Rooftop Solar Photovoltaic Scale-Up (Sunshine Schools) Project**

The project aims to increase the share of clean energy in electricity consumption and to demonstrate the viability of the renewable energy service company model for scaling up the deployment of rooftop solar photovoltaic systems in schools and other educational institutions in Beijing Municipality. The "Sunshine Schools" Program will install 100 mega-watts of solar power in about 1,000 public schools and colleges in Beijing representing the biggest solar photovoltaic project in the public sector to date.
