## Yunnan Honghe Prefecture

### Diannan Center Urban Transport

#### Green Bond Criteria: Mitigation

Improve the safety, accessibility, and efficiency of trips taken by residents in the core urban areas of Mengzi city and Jianshui county.

#### Expected Results include:

- Reduced average travel time for public transport users; doubling access to transport services to reach 742,000 people; increase ridership to 153,400 trips/day
- Reduce the number of transport related fatalities

#### IBRD Loan Amount:

US\$150 million

#### Country Challenge

Located in China's southwestern Yunnan province, Honghe Prefecture, capital city of Mengzi City and adjacent Jianshui County (population 750,000), are facing challenges of many expanding urban areas: missing links in road networks, inadequate public transport systems, and underdeveloped traffic management systems. This results in impaired mobility, congestion, poor safety, and air pollution.

#### Project Goals.

The project supports improvements in the major transport corridors, including new infrastructure (e.g., better links, bypasses, road safety design, and bus corridors, stops, and bays), equipment to provide better public transport services, staff training, education campaigns, and a demonstration program to improve transport safety for school children.
