

## Description

**Purpose:** To help Indonesia protect and sustainably manage its unique coral ecosystems in several selected districts and five provinces in the country.

**Expected Results (include):** Finance projects that support preparation of zoning plans, application of integrated coastal management, sustainable fisheries management in selected fisheries management areas and, piloting community rights-based approach. Monitoring and evaluation of project performance also evaluated.

**IBRD Financing:** \$47.38 million

## Development Challenge

Sustainable management of coral reef resources, associated eco-systems and bio-diversity for the welfare of the communities in seven selected districts of five provinces in the country.

## Project Description

The project helps develop Conservation Areas where fishing will be restricted while providing communities rights to other areas for sustainable fishing and helps them develop income generating activities that are compatible with healthy marine ecosystems. It supports the government efforts in better monitoring and management of its marine conservations areas. Objectives include institutional strengthening for decentralized coral reef management, development of ecosystem-based resources management, strengthening sustainable marine-based economy; and project management, coordination and learning.
