</tr>
<tr>
<td>CLEARING</td>
<td>Generally Euroclear and Clearstream (either bearer or registered format); DTC (registered format only)</td>
</tr>
<tr>
<td>CURRENCIES</td>
<td>Wide range of currencies</td>
</tr>
</tbody>
</table>

Liquidity Backstop

Dealers in all World Bank bonds – including structured notes – are required to provide secondary markets in the notes that they underwrite. The World Bank may, at its discretion, buy back all or a portion of certain debt issues from approved dealers at market prices, subject to asset-liability constraints.

Examples of Structured Issues

- Callable or puttable notes
- Floating rate notes with caps, floors or collars
- Step-up and step-down coupons
- Notes linked to an equity, bond, hedge fund index, or to a constant maturity swap rate
- Dual currency notes
- Powered dual currency notes with foreign exchange optionality
- Other unique structures as requested by an investor and designed together with the World Bank

Reverse Inquiry

To propose a new issue, contact us directly or contact an underwriter. Our decision to proceed with the transaction will be guided by:

1. Minimum size requirement depends on the type of structure and can be even less than USD 5 million or equivalent in other currencies
2. Minimum maturity one year
3. Complexity of the transaction
4. Suitability of investment for the proposed investor
